

ACEskirt™

A ZTA Innovation for Skirt Liners

ACEskirt™, when metallic hard skirts can't deliver the service life you need, ZTA hard skirt liners significantly enhance the life of skirt liners and in doing so reduce the OH&S hazards and plant downtime associated with hard skirt adjustments and changeouts.

ACEskirt™ encompass custom made ZTA tiles with a bull nose profile providing greater impact resistance and to eliminate belt tear potential.

ACEskirt™ can be supplied in conventional hard skirt configurations including S96C, S98C, BT32 and SL300 so no onsite modifications are required for installation.

**NEW
PRODUCT**

ACEskirt™

Composition

ZTA	25.3%
Alumina	Balance

Microstructure

Apparent Porosity	2.6%
Apparent Density	4,200kg/m ³
Hardness	1,455 HV ₁₀
Fracture Toughness	3.2MPa (√m)
Rubber Hardness	60 Shore A +5
Rubber Elongation	400%
Resilience	65%

BENEFITS

- Extreme wear resistance in sliding abrasion applications
- Reversible design options available to extend the life of the liner
